SIMPLY SPEAKING, WE ARE A GRAPHIC DESIGN,
ADVERTISING AND MARKETING GROUP
WITH JUST THE RIGHT BLEND OF EXPERTISE,
CREATIVE TALENT, MARKETING SAVVY

AND GENUINELY NICE PEOPLE.■

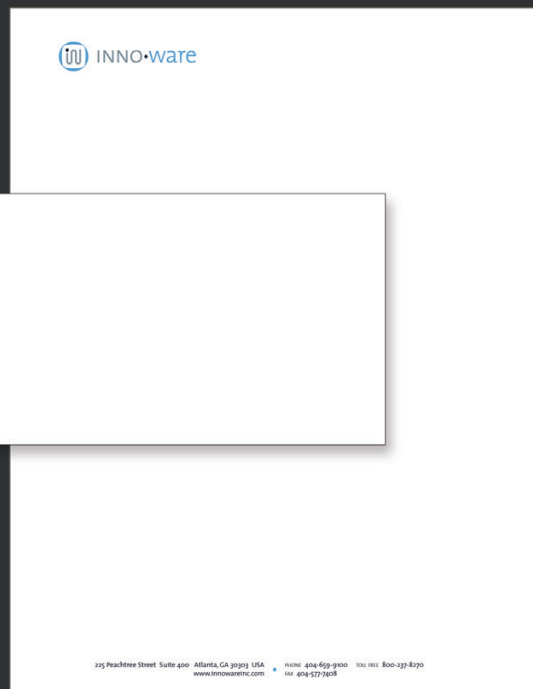

CREATIVITY

IS AT THE CORE OF OUR BUSINESS.
THROUGH IT WE FOCUS ON

YOUR BUSINESS, YOUR NEEDS, YOUR RESULTS.

WE INVITE YOU TO REVIEW OUR WORK
AND WE LOOK FORWARD TO BRINGING YOU

CREATIVE SOLUTIONS THAT WORK.

Innoware

Manufacturer and distributor of disposable plasticware and paperware for the food-service industry.

IDENTITY DESIGN

Logo design incorporates the shape of the company's major product line. A festive, food-complementary color system, anchored with grays, was developed for consistency.

BUSINESS COLLATERAL

2-sided Business Card
Letterhead & Envelope

OFFICE GRAPHICS

The color system along with the logo circle shape were used throughout the company's headquarters. The wall graphic states the company's philosophy.

PRODUCT LOGOS

ECO™ Return to Nature logo for line of compostable containers and ECO container awareness stickers.

ADVANTA™ logo for a newly developed container plastic.

SIGNAGE

Factory incentive sign with company value statement.

Set of 3 pull-up sales signs that can be used together or individually.

INNO-ware

GOOD REPUTATION

WINTER 2010

INNO-ware

Designed to BUILD
your BUSINESS

Whether you
sell it, take it out,
or anything else,
it's no longer about
getting your food from A to B.
Consumers expect an
experience, which impacts
your sales like never before.

InnoWare's premium line of
plastic containers meets
today's serving demands in ways other companies
may not have considered. Think a variety of
products with immediate eco-benefits. Extremely
durable and trendy, designed to streamline prep
and transport. And a simply better solution that
can help you build your business.

Restaurants to supermarkets, snacks to entrees.
Any food, any application. What we put into our
containers is nothing compared to what you'll
get out of them.

All InnoWare products are manufactured in the USA.

INNOWARE MATERIAL GUIDE

Selecting the right material is critical to your success. Our MATERIAL GUIDE makes it easy.

Takes the HEAT
and KEEPS FOODS
warmer.

Polypropylene is highly resistant to heat,
grease, sugar and acid. Its key advantages are
strength and toughness, making it the ideal
microwavable, reusable container. InnoWare's
Advanta™ blend uses up to 25% less plastic
than standard polypropylene, while improving
rigidity and insulation properties, durability
and flexibility. Advanta™ is also surprisingly

	ADVANTA™ -40°F to -350°F Microwave Heat Stable Refrigerator Safe	PS MICRO 0°F to 120°F Microwave Refrigerator	PS 0°F to 180°F Refrigerator

The HOTTEST
THING for COLD
applications.

PETE is short for Polyethylene Terephthalate. Our PETE products are made from at least 50% postindustrial recycled material. Primarily for cold applications, PETE products offer several advantages. Like excellent barrier properties, superb lid clarity, cut resistance, and a high gloss finish for exceptional merchandising appeal. It's strong and durable, yet flexible. PETE is today's go-to material for eye-catching displays.

Made FROM PLANTS
not petroleum.

PLA stands for Polylactic Acid, a 100% sustainable and annually renewable material derived from plant sugars. Manufactured from InnoWare's plastics, which biodegrade within 60-180 days in commercial composting facilities. Best for cold applications, our bases also have a higher heat range than most biodegradable resins due to our unique resin blend. InnoWare's ECO PLA products release no toxins and are completely disposable with food waste.

EZ to SECURE
Easier for large orders

Both Monster Box™ and Dinner Box containers are perfect for multiple orders. Monster Box™, equal to half a room table, is uniquely built for large family size and catering orders. EZ Close lids snap securely shut and prevent spillage when stacked. Compartments improve on portion control, food separation, and keep each item at just the right temperature. Vented preserves just-prepared quality, legend-rated lids add appeal, and all are microwavable. Quite simply, they're containers that can impact your sales in a big way.

PRIME INGREDIENTS
FOR SUCCESS

Operational Ease
EZ Close lids allow your operations to move faster, saving on labor costs. Compartments facilitate portion control.

Carrier Efficiency
Stackable, interlocking design doesn't slip during packaging and saves on carrier freight.

Consumer Experience
Compartments preserve food integrity, prevent migration, improve leftover storage.

25

CATALOG

28-page print catalog showcasing the InnoWare container product line and related services.

FEATURE ICONS

We also design a system of icons that quickly identify key product features. These are used throughout all product literature.

INNO·ware

PETE

Superior Presentation • Enhanced Merchandising • Increased Profits

Our new PETE OctaView® containers are the perfect solution for your cold food applications.

- Crystal clear lid and shiny black base allow for premium pricing.
- Greater barrier properties extend product shelf life and increase profits.
- Made from recycled post-industrial PETE — carries the #1 recycle mark.
- Octagonal design proven to drive impulse sales.
- Great for display cases!

Lid Clarity & Shiny Base

- Perfect for displaying items in cases, allowing for impulse sales.
- Anti-fog lid is ideal for superior food presentation.
- Reinforced heat sealable dividers hold in bags & freezer.

Secure Stacking

- Stacks on itself and counter space.
- Locks on interlock design.

Expressions™ — the style of dine-in and to-go.

NEW SIZES • NEW FEATURES

EXPRESSIONS, our newest line of premium 2-piece containers continues to grow, and with these expansions come exciting new features for you!

NEW! Non-Microwarable!
EXPRESSIONS customers can now resist heat up to 225°F, which enables you to utilize these versatile containers for hot or cold foods. Whether for dine-in or to-go, you can always expect a "hot" presentation with our EXPRESSIONS line.

NEW! Mix and Match!
Our interchangeable lid system simplifies operations, reduces inventory, and saves space. The possibilities can be endless, but your inventory doesn't have to be.

ingo

Sustainable

- Made from plants — not oil!
- Annual renewable resource.
- Uses Ingeo™ plastics, less greenhouse gases added to the air.
- Made in the U.S.A.
- 100% compostable in 60-180 days within a commercial compost facility.

Versatile

- Two-piece & hinged products.
- Crystal clear lids or solid embossing lids available.
- Great for a variety of cold food applications.

Stylish Shape & Natural Color

- Natural color underscores eco-friendliness.
- Contemporary shape — sleek and appealing.
- Color complements the look of salads, fresh fruit and more.

Lid Embossing

- Low custom embossing minimums.
- ECO logo embossed on solid lids at no cost — conveys an "earth-friendly" message.
- Solid and clear lids can be embossed with your logo/message.
- Builds brand and product recognition.

ECO
Return to Nature.

Durability

- Stronger and more durable than most compostable packaging on the market.
- Stackable containers add speed and safety to large take-out orders.

Transportation & Storage

- Combines dine-in & take-out containers to reduce inventory and preserve storage space.
- Secure stacking lids for easy handling and transport.
- Small cases are easy to handle.

PRODUCT FLYERS

Numerous single page sales flyers, with a consistent layout, were developed for the various product lines.

ECO™ RETURN TO NATURE

We designed the logo and separate color system for the marketing of Innoware's brand of bio-degradable containers.

Serving clients is your top priority.
Helping you to do it successfully is ours.

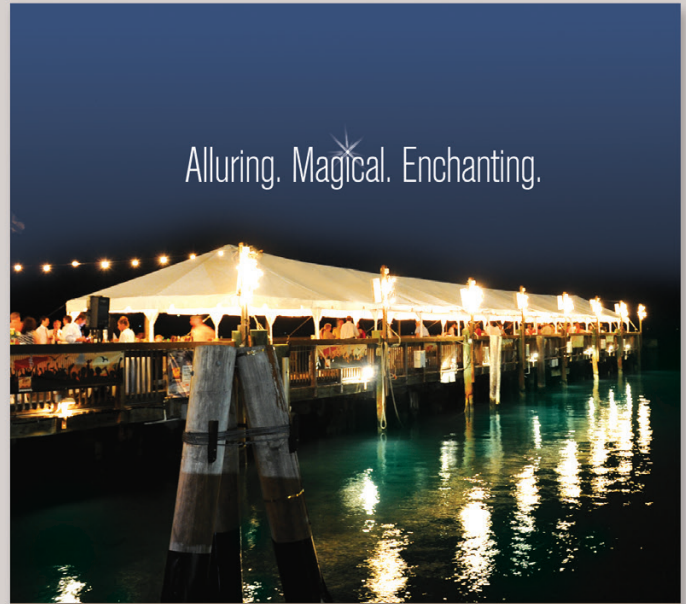

Our tents are meticulously engineered and manufactured to provide stability, strength, beauty and protection. Their outstanding durability and ease of setup make them ideal for one-day events or installations requiring long-term use.

- Wind load tested up to 80 mph, and designed with components that work together to handle loads as they are transferred through the system.
- Easy installation with fail-safe steel snap buttons & adjustable legs.
- Covers are durable, 18oz. lacquer-coated black-out vinyl.
- We ship worldwide – hundreds of 10' to 40' tents in stock.

These are just a few of the festive hallmarks of our TRIO Traditional tents.

Our TRIO® frame tents are known for their stylish versatility and engineered stability along with their ease of handling and maintenance. But the overlooked features of this extraordinary line of event tents are the instant festive ambiance and magical backdrop they bring weddings or any event, be it day or night.

The TRIO line of tent covers are offered in three stylish designs, but the Traditional is one of our most versatile styles. The TRIO Traditional ranges in widths from 10', 15' and 20' and with the addition of mid-extensions can be set up to most any desired length.

Clear top tent covers bring nature's dimension to any event.

When you don't want to occlude the beauty of an event site, clear tent covers are the perfect solution to bring it all in. Economy Tent's clear covers are designed to let nature's backdrop be part of the event while still providing overhead protection. Evening and night events are especially magical when adding lighting to complement the glory of a starry sky.

All our clear covers are custom made to fit both our Trio® and Classic™ frame systems in two beautiful and durable Burlin Skyline™ 18-mil clear vinyl with embedded filament lines that prevent cover expansion.

Mimaki

Mimaki USA

Manufacturer of large-format digital printers, cutters and inks.

PUBLICATION ADVERTISING

Trade publication advertising targeted to the various industries that utilized this equipment, both in the North and South American marketplace.

"The dual roll, super wide sign monster."

"Flexibility in more ways than one"

"Instant style"

"Energize your sportswear"

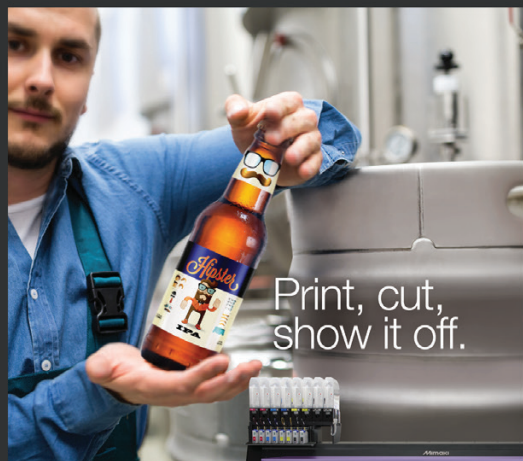

SUPER WIDE. SUPER GRAPHICS.

Create super-sized soft signage and framed backlit panels with the new Mimaki TS500P-3200 transfer sublimation printer. Or use its grand format size for high-volume decor and apparel runs. Whatever digital textile application you're producing, Mimaki has a super way to achieve it.

mimakiusa.com/TS500P-3200

Mimaki

Print, cut,
show it off.

Higher quality, integrated contour cutting, silver ink for metallic effects – all combine on the Mimaki CJV300 Series to produce distinctive presentations from labels to store fronts.

mimakiusa.com/CJV300

Mimaki

Pop creativity with fluorescent inks.

The TS30-1300 is a high performance, 54-inch entry level transfer sublimation printer now compatible with Sb54 fluorescent inks. The TS30-1300 is ideal for small production, on-demand work such as apparel prototypes, designs and custom goods.

mimakiusa.com/TS30

Mimaki

"Super wide. Super graphics."

"Print, cut, show it off."

"Pop creativity with fluorescent inks."

mmicreative

EXTEND YOUR PRODUCTIVITY

The Mimaki JFX200-2531 UV-LED extended bed printer doubles the print area with two origin points. Prep one job while the other is printing for continued productivity. Or print oversized boards on its generous 8'x10' table for great graphics that grab attention.

mimakiusa.com/JFX200-2531

Mimaki

GO XL

The Mimaki JFX500-2131 extra-large 7'x10' flatbed is ideal for a diverse range of rigid signage and displays for both indoors and outdoors. Three types of UV ink offer maximum media versatility with energy-conserving LED curing.

mimakiusa.com/JFX500

Mimaki

Purpose built. Production minded.

The new Mimaki UJF MkII Series printers are the next generation models in the world's best selling UJF Series line of small footprint benchtop UV-LED printers. Designed to bring ideas to reality, these production-focused professional tools, built on a proven platform, will deliver consistent quality for any level of production.

mimakiusa.com/UJF-MkII

Mimaki

IDEAS TO REALITY

Feel free to think inside the box again. With the new Mimaki Original Goods Package System (OGPS) you'll have a total solution for creating complete package prototypes including printing on objects and materials, and die cutting package patterns.

With this system – a UJF-6042 MkII UV-LED benchtop printer, a CFL-605RT compact cutting plotter and ArtiosCAD D5 software with over 400 packaging templates and easy editing functions – you can achieve bold, innovative package designs, prototypes, and on-demand production in a flash.

mimakiusa.com/OGPS

UJF-6042 MkII + CFL-605RT + ArtiosCAD D5 = PACKAGING REALITY

GUITAR CUSTOMIZATION • PERSONALIZATION • BRAND PROMOTION

LICENSE TO ROCK

Mimaki, in a joint venture with ArtGuitar, is now giving you a "License to Rock." With the purchase of a Mimaki UJF-700 UV printer, Mimaki is offering guitar manufacturers and specialty printers a license to use ArtGuitar's patented technology for printing directly on to virtually any type of guitar.

ArtGuitar has developed a unique patented process for applying ink digitally onto either an unfinished wood or a painted guitar body. With the exclusive use of Mimaki's rapid printing, high quality UJF-700 UV printer, printed guitars can be mass produced for special promotions, printed as customized limited editions, or as personal one-of-a-kind designs.

The advantage of customizing guitars with UV inkjet printing is that the process is more efficient and less costly than air-brushing. It is more durable than adding vinyl wraps or decals. With the addition of a polyurethane or lacquer top coat, the UV-cured design stands up to a lifetime of heavy use and cleaning of the instrument.

This unique printing process is also ideal for all types of guitar-shaped products and promotional items.

UJF-700 UV FLATBED

Mimaki is an official licensee of ArtGuitar.

Mimaki's UJF-700

Mimaki UJF-700 UV printer features:

- Prints directly on to items up to 5.9' thick, 27.6' x 23.6' vacuum printing bed
- 7 color printing - CMYK+2 inks including white under or over-printing plus ink
- Uses durable hard and flexible UV inks
- 4-point optical positioning recognition system, 1200x1200 dpi resolution
- Strong Superspeed System for suitable drop-free printing

Mimaki UJF-3042FX
Ideal for customized guitar accessories

The versatile, battery-operated UJF-3042FX is the ideal companion to the UJF-700 for customizing on music accessories items such as:

- Guitars • Amps • Cases • Accessories

Go beyond expectations.

Paper? Plastic? Fabric? Whatever the request you'll grow your business with the new Mimaki JV Series printers. Built on the proven Mimaki JV Series platform, these roll-based printers include new innovative technologies that facilitate increased throughput, reduced waste and lower cost of operation. Meaning, you can produce everything in your current book of business at higher quality, with shorter turn around and at lower cost per print. Also, with eight ink channels, an expanded color palette, and the ability to print on hundreds of substrates, you gain the application versatility to confidently take on new business.

Go beyond conventional.

Mimaki JV300 Series printers go beyond extraordinary to deliver an awe-inspiring range of applications and versatility. Gamut extending eco-solvent inks and variable drop technology enable you to accomplish anything from fine art reproduction, wall decor and stunning backdrops, to vehicle wraps and outdoor displays. Or choose dye-sublimation inks to create vibrant wearable textiles, unique home fabrics, or soft signage. Using the Mimaki JV300 Series printer's superb quality, color fidelity, throughput and flexibility you'll go beyond the expected to capture more wallet share and deliver whatever your customers can imagine.

JV300 SERIES PRINTERS

EQUIPPED WITH MB33
JV300 Series printers are equipped with the space-saving MB33 Mimaki Bulk Ink System 3 featuring economical, high-capacity 2L ink pods that enable longer, uninterrupted production and reduced cost per print.

SMOOTH FEEDING PINCH ROLLER SYSTEM
Close-positioned and independently adjustable pinch rollers ensure smooth, consistent media loading for high-speed, accurate imaging. From heavy canvas to lightweight paper, your media progresses smoothly without feeding or damage.

MAPP3 BRINGS IMAGES TO LIFE
By fining the dot pattern and subpixel pattern, the unique imaging technology of the MAPP3 (Mimaki Advanced Pixel System 3) practically eliminates banding often seen in conventional printing.

Mimaki

PRODUCT FLYERS

Sales flyer for a UV printer that can directly print on objects such as guitars for customization.

E-BLASTS

Promotional e-blasts are designed according to a set template, and regularly sent to regional mailing lists.

Gran Manor Cabinetry
Brand of ready-made, high-end wall and base cabinetry distributed in Lowe's home improvement stores in the southern US.

LOGO & MARKETING DESIGN
An elegant logo with a traditional leaf motif, indicative of fine carved furniture, was designed. The leaf design along with a consistent color palette was used throughout the packaging and marketing for a cohesive look.

LOWE'S STORE DISPLAY
Packaging was designed to protect but to also let the customer actually see and feel the product. For easy selection, a color code was implemented for the wood finishes and a letter code for the various sized cabinet pieces.

Cumming Station

Cumming Station

One of a kind lofts and shops in downtown Cumming
125 Tribble Gap Road, Cumming, GA 30040

Upscale Loft Living In Cumming

Unique to Cumming, Georgia is a mixed use four-story structure with old world charm conveniently located on Tribble Gap Rd just north of the Square in downtown Cumming. CUMMING STATION includes entry level shops and loft condominiums constructed of reclaimed brick from an old cotton mill in Virginia. Above the shops are three stories of unique loft condominiums. With an open floor plan and abundant windows, each unit is surrounded by natural light and a panoramic view of either downtown or Sawnee Mountain.

One of a Kind Lofts and Shops in Downtown Cumming

Striving to restore the historic appeal of downtown Cumming through a community-oriented development is what Cumming Station is all about. Mike Evans, one of the development partners, says "I have always wanted to put a 100-year old building and do something really unique inside. Unfortunately there are few old buildings left in downtown Cumming, so we decided to build one that looks old."

The Cumming Station development is part of a local trend in reviving the vitality of downtown living in north Georgia communities. Cumming Station is ideal for those interested in rural, small town living yet desire only a short drive to the bustling metropolitan city of Atlanta.

Cumming Station is located just minutes from beautiful Lake Lanier known for its opportunities for boating, fishing and recreation. Forsyth County, in which Cumming is the county seat, lies in the foothills of the majestic Appalachian mountains of north Georgia. Within the county are numerous parks and recreational areas to enjoy the natural beauty of the area.

The City of Cumming abounds in nearby shopping and the community lies between the sprawling Mall of Georgia, the North Georgia Outlets, and newly opened The Avenue with its unique upscale shops.

factory structure with loft condominiums conveniently located just north of Tribble Gap Road in downtown Cumming.

The project includes entry-level shops and loft condominiums constructed of reclaimed brick from an old cotton mill in Virginia. Above the shops are three stories of unique loft condominiums. With an open floor plan and abundant windows, each unit is surrounded by natural light and has a view of either downtown or Sawnee Mountain.

The lofts are accessible by elevator through a secure, card-key entry lobby. Every loft includes a storage room in the basement of the building, and loft owners have access to a magnificent rooftop terrace with incredible views of downtown Cumming and Sawnee Mountain.

Call, fax, or e-mail Susan Daniels today. The actual floor plan and entry restrictions are located between these four retail spaces.

Future RESTAURANT, FUTURE SPACE, Cumming Station, Office of Cumming Station

LOFT AMENITIES

- Full fire alarm & sprinkler system
- Reclaimed brick building exterior
- Exterior and landscaping maintained through Homeowners' Association
- Key restricted lobby to resident entrances
- Resident elevator access
- Access to common area rooftop terrace
- Video security system
- Trash chute on every floor
- Storage unit for every loft in basement

Every level of residences at Cumming Station offers each of the four available floor plans.

UNIT D — Faces South/East towards downtown Cumming

- Large, combined Living/Dining
- 2 Bedrooms; Split Layout
- 2 Full Baths
- Full-sized Kitchen
- Laundry
- Walk-in Master Closet
- Sleep Out Balcony

Loft Floorplans — A & D

Cumming Station

Built in the north Atlanta town of Cumming, GA, "Cumming Station" is a new construction, multi-use apartment building that was designed to resemble an old factory building.

LOGO DESIGN

The name "Cumming Station" and the building design resembled an old building that would be alongside railroad tracks, so the logo was given a railroad look.

POSTCARD FLYER & BROCHURE

Both the over-scale postcard and brochure played up the old, reclaimed brick that clad the building but kept a modern feel to the pieces since this was new construction with modern amenities.

BRAND LOGOTYPE

American Gas Log's main brand - Best Fire - was given a separately designed look.

GAS LOG BROCHURE

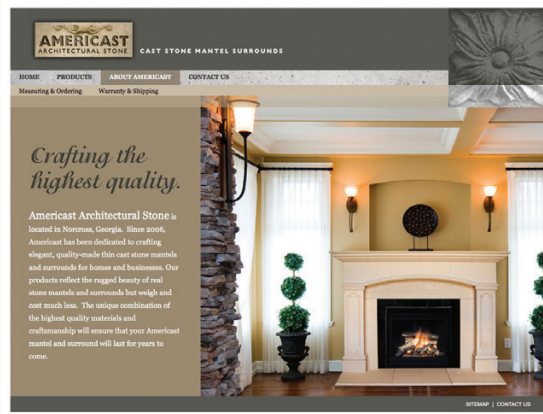

An oversized tri-fold with a brief overview of the entire line of gas log sets. The same color system used on the web site is used in the printed collateral.

PRODUCT FLYERS

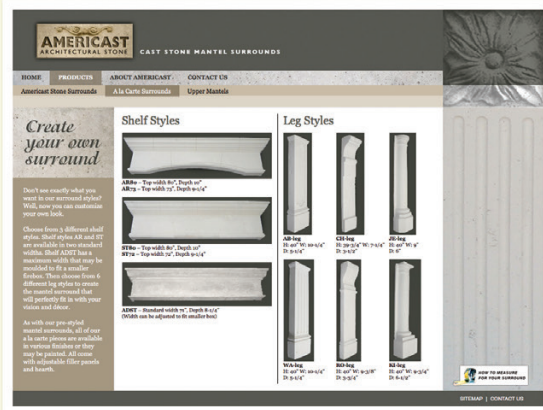

Individual flyers for each of the gas log sets, accessories and outdoor products were developed.

Americast Architectural Stone

Sub-brand of American Gas Log and manufacturer of thin-cast stone fireplace surrounds.

WEB SITE

A catalog-style website was designed to showcase the surround styles. Each mantel style is represented by its own color for identity.

LOGO DESIGN

A 3-dimensional logo was designed to reflect the cast stone quality. A simpler, flat 2-color version was also designed.

PRODUCT COLLATERAL

Overall and individual product flyers were designed. Each style is represented by a specific color that matches the web site.

Grill Islands

All PGE Grill Islands are customizable. Choose the size appropriate for your space and then decide what components you want in your outdoor kitchen island. All grill islands are constructed of a heavy-duty aluminum frame with durable handblasted finish. Grill islands are available unfinished or finished. Unfinished islands are ready for you to apply stone or a finish of your choice. Finished grill islands come with a 30-year or 5-year base and the counter top, but available in a variety of colors.

Countertop tile & base color selections (actual colors may vary)

Below are a few popular outdoor grill island configurations (Additional configurations available)

PGE
Patio Cuisine Elements

Stainless Steel Grills and Grill Islands

A complete line of premium quality stainless steel grills and grill islands for carefree outdoor living.

Patio Cuisine Elements gas grills are constructed with the highest quality materials. Coupled with a sleek design and simplicity, PCE grills are the platinum standard of grills and offer a complete solution for outdoor cooking.

PGE
Patio Cuisine Elements

More than you can imagine,
for less than you can believe.

This is not just a clever marketing slogan – our printers really live up to what we say. Starting at \$74,999* the CET Color printers are engineered to deliver the imaging quality, speed, value and reliability printers available at twice the cost!

AFFORDABLE LARGE-FORMAT UV PRINTING SOLUTIONS

Our product portfolio demonstrates value-added combinations of that make graphic communication solutions for the wide-format market more affordable and more profitable. Sign and graphics production quality prints quicker and more efficiently in order to meet the demand to do this by handling larger volumes of work more

But they say, "We actually consider them a 'partner' in our business. We've had our printer up and running in less than a day – getting things done was comprehensive and thorough... Since installing the printer, we've been impressed with the time saved per job and its ease of use. It has been a great investment." Ron Grubbs | Midwest, WI

huge advantage of UV ink is reduced print head maintenance and failure compared to solvent systems since UV ink remains bound until exposed to UV light. Less clogged nozzles means less downtime, less waste and more time printing valuable output.

Exceptional service and warranty coverage for every printer we sell.

CET Color is dedicated to making sure that service is never an afterthought when purchasing any of our new UV printers. We know uptime, all the time, is important to business owners and that downtime can cut into profits – so we take service seriously.

In order to make sure ALL of our customers, no matter where they are located, are receiving the support, maintenance, installs and services they require, we have partnered with Integra Imaging Technologies to assist us with ensuring a seamless service experience when needed. Integra's TMS best service group for color printers in providing printing professionals unparalleled support in the large format UV value printing industry. Combined together, there is no better value format color printer in the market.

K-Series 1000 True Flatbed & Hybrid UV Printers

THIS STATE-OF-THE-ART UV FLATBED & HYBRID ARE ALL ABOUT DELIVERING THE HIGHEST QUALITY IMAGING AT JAW DROPPING PRODUCTION SPEEDS.

INTERFACE	High speed PCI
IMAGE FORMATS	JPEG, TIFF, EPS, AI, PNG
RIP SUPPORT	Onyx, Caldera
POWER SUPPLY	220V / 30A / Single phase
ENVIRONMENT	49°F-84°F, 40%-95%RH
DIMENSIONS L x W x H	15.9' x 6.4' x 4.3'
MIN. WORKING AREA	16.5' x 16.5' x 8'
WEIGHT	2645 lbs

The K-Series 1000K UV Flatbed and K-Series 1000HK hybrid printers are ideal for high volume shops that do not want to give up quality. Simply, the K-Series allows you to print in very high quality at speeds which surpass traditional production speeds. With a 4.25" print area and a native 400 dpi print head, you don't have to sacrifice a thing. You'll be able to produce more than 20 boards an hour that your customers will be thrilled with.

The customizable print speed improves imaging work flow with pre-set media settings, a faster RIP and the ability to change print quality without re-inking. The integrated 4-zone, reversible vacuum holds media stationary while printing, eliminating the need for consumable gips and extra setup time. The table also has a unique pin registration system for accurate and consistent rigid media placement and full-bleed printing capability eliminates the extra finishing steps of trimming prints.

► The ultimate in print head speed and imaging quality.

The state-of-the-art Spectra print heads are 5-level grayscale imaging a true 400-dpi. They feature an amazing 3600 nozzles per head and print 4.25" with each pass.

X-Series 500 | 1000 True Flatbed UV Printers

THE X-SERIES 500 & 1000 ACHIEVE FASTER SPEEDS WITHOUT SACRIFICING QUALITY – PERFECT FOR 2-SIDED PRODUCTION WORK.

5'x10'
MAX. MEDIA SIZE

The X-Series 500 and X-Series 1000 flatbeds are the perfect combination of speed and quality when it comes to rigid media production work. With a remarkable production printing speed of 480 sq/ft/hr, the X-Series 500 can print up to fifteen 4x8 Coroplast boards an hour, and the X-Series 1000 prints up to an astounding thirty boards an hour!

Both X-Series models feature Spectra Polar print heads with the X-Series 500 customizable to 8 print heads and the X-Series 1000 upgradable to 16 print heads. They both feature an integrated 4-zone vacuum table that holds media stationary while printing, along with a unique pin registration system for accurate and consistent rigid media placement and a reversible blower for ease of loading/unloading. The full-bleed printing capability eliminates the extra finishing steps of trimming prints.

► Faster white ink printing.

White ink over or under-printing keeps the image color bright and vibrant on transparent and colored media. The ability to simultaneously print white ink on the same pass as the other colors saves production time.

► State-of-the-art, ultra-fast print spooler.

For Onyx and Caldera, the CET Color X-Series print spooler allows for settings shortcuts and quick work turnaround. As an example, the time from the end of print to starting the next sheet is only 17 seconds.

X-Series UV Flatbed Specifications

X-Series Hybrid
1000HL
126" [3.2M]
MAX. ROLL WIDTH

The X-Series 500H & 1000HL UV Hybrid R.T.B./Flatbed printers are ideal for the shop that needs to have the versatility to print on roll media or rigid flatbed media with just one printer.

The X-Series 500H has the ability to handle rigid or roll media up to 100" wide while the X-Series 1000HL can go up to 126" wide. The media is held firmly in place on the perforated belt by a 4-zone vacuum system.

The detachable flatbed tables have a unique alignment system for accurate and consistent rigid media placement and full-bleed printing capability eliminates the extra finishing steps of trimming prints. Set up from roll media to flatbed use, and back again, is a breeze.

► Belt driven, vacuum flatbed area.

Media, both rigid and roll, is advanced through the stationary print gantry on a full width belt conveyor. The media is held firmly in place on the perforated belt by a 4-zone vacuum system.

► Allows for printing on rigid media up to 2.25" thick.

The X-Series 500H and 1000HL deliver even more imaging versatility with its wide print head clearance for extra-thick materials.

K-SERIES K500i | K5000i | BY PRINTING PRESS

THE BEST LARGE FORMAT UV PRINTING PRESS – PERIOD!

★ QUALITY.
Unsurpassed Quality — Revolutionizing the large-format UV flatbed and hybrid market, the K-Series printing presses boast an unheard of 3.5 picometer drop size. This super-fine drop results in producing the absolute highest quality prints ever seen in the industry.

⚡ PERFORMANCE.
Unparalleled Performance — Utilizing the 42" wide Kippora true granulate print head, the K-Series images ultra-high quality print at speeds up to 800 fth/m. With this unsurpassed combination of quality and speed, the K-Series printers can output up to twenty-five 4'x8' boards per hour!

💰 AFFORDABILITY.
Unbelievable Priced — When compared to similar printers in the market, the K-Series line of printing presses feature a considerably lower initial investment cost along with lower long-term operational costs. This adds up to a much shorter return on your investment, allowing profits to start growing sooner.

The Difference. See the Results.

Komatsu gives a new look to your forklift. Extensive research and ergonomic engineering provides the operator with easy access and a wide open view. You can see the comfort and confidence through increased productivity.

The New Look

- Slim line steering column
- Small two-spoke steering wheel
- EZ View mast
- Large dash display on console
- Ultra-bright LED headlights

Operator Comfort And Confidence

- Tilt steering column
- Wide open floor with optimum pedal placement
- Komfort® seat
- Large entry access hand grip
- Levered step height
- Cupholder, convenience tray and work order clipboard
- Low noise level with on-demand power steering
- Operator controlled speed limiting turtle mode

Komatsu Gives You More

- One piece, cast steel final drive housing
- Rubber mounted steer axle with double acting steering cylinder mounted inside axle structure
- Water-proof electrical connectors
- Heavy-duty, self-activating, drum and shoe service brakes
- Welded frame construction with integral hydraulic reservoir

Let us show you how durability by design and industry leading technology can accelerate your productivity. Contact your authorized Komatsu dealer today.

KOMATSU BBX50 MADE ESPECIALLY FOR YOU

The BBX50 speaks directly to your bottom line with an extended model range and optional packages to handle your special application.

- UL "E" rating as to fire and electric shock hazard
- Freezer conditioning for cold storage applications
- Slide-out battery removal for multi-shift operation
- Large battery compartment for extended run time
- 6,500 lb. capacity model for larger loads
- Special tires for wet floors
- "Touch and Go" directional pedal option
- Integral sidehill for increased capacity
- A variety of attachments available for custom applications

THE KOMFORT ZONE

MULTI-PURPOSE DISPLAY AND PROGRAMMING PANEL PROVIDES EXCEPTIONAL VALUE AND VERSATILITY

Communication Center

- Battery state of charge indicator
- Travel speed and drive power indicator
- Service message, parking brake and turtle mode indicator
- Two line, 24 character system status display message

Programmable Performance

- Driver selectable turtle mode
- Supervisor adjustable performance-power curve, lift speed, tilt speed, travel speed
- Technician adjustable parameters—supervisor override, maximum travel speed, regenerative braking (four modes), hour meter indicator, battery state of charge indicator and lift interrupt
- Maintenance monitor mode
- Password protected access, no service tool required
- Automatic selection, dual-voltage system, 36- or 48-volt

The Strongest Link in the Supply Chain

The Leader in Total AC

- AC master controller—self-diagnostic, low maintenance
- AC traction motor—maintenance free
- AC hydraulic motor—maintenance free

The Leader in Reliability

- No power steering motor
- LED head lamps (optional LED tail lights)
- O-Ring face seal hydraulic fittings
- Durable and quiet helical gear, double reduction trans axle with transverse mounted drive motor

Komatsu Forklift

Manufacturer and distributor of commercial forklifts of all sizes and types.

Tam's Backstage

Upscale, bistro-style restaurant located in the historic original schoolhouse in downtown Cumming, GA. It shares the building with the Cumming Playhouse.

LOGO DESIGN

Though there are variations of the logo, the main logo uses staging spotlights and a 1930's style text to convey its location and theme.

GIFT CERTIFICATE

Designed like a vintage theater ticket, the restaurant's gift certificate is presented in a vellum envelope.

MENUS

Dinner, Lunch, Wine & Dessert menus are printed on a heavy parchment paper and are presented on leather holder boards.

"TAM'S TUPELO" IDENTITY

A logo and color system were designed for a sister
Tam's restaurant – Tam's Tupelo – that opened in 2016.
The same oval "Tam's" used for Tam's Backstage
restaurant was used to connect the two restaurants as
being under the same ownership group.

Founded in 1989 with the objective of developing curing technologies that preserved quality taste of tea extracts and distillates, proprietary technologies for tea have been refined to provide the finest in custom tea extracts. We also specialize in the finest in natural blends of fusion beverages.

Integration is the key to success. We manage every aspect of development. We start with

the procurement of premium teas, coffees, botanicals or fresh fruits from growers the world over. Extensive flavor-management research is conducted to confirm the process and to provide a basis for preserving fresh flavor quality. The selected tea, coffee or botanical is processed through our proprietary method of separating the brewed product into its various natural components.

All our products are completely customized to the exact specifications of each client.

These compounds – such as pure flavor essence, caffeine, and

antioxidant catechins like EGCG – are re-blended by our technical staff into customized, highly concentrated beverage extracts. From here, other flavorings can be added to produce even more unique taste options.

Taste your future. Let Amelia Bay formulate your success.

Amelia Bay has the best state-of-the-art extraction process available to the beverage industry today. We are dedicated to giving our clients the absolute finest in botanical extracts along with the individualized customer attention they expect.

Custom Flavor Development

Amelia Bay provides over 25 years of flavor technology and offers full product development for all beverages including dairy and soy products. Licensed and registered flavor technologists support your beverage objectives complete with manufacturing guidelines and sweetener specifications.

- Custom service and technical capabilities:
- Raw material sourcing and acquisition
- Custom extraction and blending
- Solids removal and refinement
- Fruit flavor manufacturing for flavored teas
- Custom concentration ratios
- Non-nutritive sweetener recommendations including Splenda®
- 55 and 42 fructose
- Sucrose
- Granular sugar
- pH adjustment
- Computerized batch instruction
- On-site startup assistance

Amelia Bay is positioned to assist our clients with complete custom extractions and formulation.

From concept to production, all botanical extracts are customized to each client's specific product and marketing objectives. Clients are advised on everything from raw material selection to concentrate formulation and packaging. We also provide on-site startup support at the bottle or packer to ensure adherence to each product formulation.

Functional beverages for today's health-wise consumer.

There is no doubt about it... tea and coffee extracts blended with other botanicals have become today's beverages of choice. Consumers are demanding healthier beverage alternatives without sacrificing taste or convenience. They want to experience health benefits from the flavor combinations they enjoy. Amelia Bay provides those health and flavor benefits by giving you the best that nature has to offer.

Amelia Bay is an industry leader in development and manufacture of coffee and botanical extracts, essences and aromas.

Amelia Bay provides our clients with continuing in-house technical and batching support.

- A few product applications:**
- Bottled teas & tea blends
 - Bottled coffee blends
 - Coffee flavored ice cream and yogurt
 - Coffee & tea flavored soy beverages
 - Beauty & nutrition horticultural products

- Packaging capabilities:**
- Bag-in-box
 - 1 gallon jugs
 - 5 gallon pails
 - 55 gallon drums
 - 275 gallon totes
 - 5,000 gallon tankers

WHAT'S NEW?

Introducing...

Full Throttle Energy Drink & Coca-Cola with Lime!

The U.S. energy drink category is expected to be two-thirds the size of the sports drink category by 2008.

With a list of active ingredients including guarana and natural extracts, vitamins B6 and B12, taurine, and caffeine, this beverage has just the right amount of punch to add to the energy drink lineup.

The U.S. energy drink category is expected to be two-thirds the size of the sports drink category by 2008. Energy drink sales were estimated to hit \$1.5 billion in the United States in 2006, according to Beverage Report.

There are also concerns to release a sugar-free version for consumers who want to enjoy the same great taste and energizing benefits, but with fewer calories.

Coca-Cola with Lime takes the successful cold and new year age of Diet Coke with Lime, which has become the #1 flavored diet soda in America.

"Many people already enjoy a little of the new with their Coca-Cola. It's served only today to include a splash of the new in the 'Happy Hour' and 'Ready, Runners, Run!' event program, Coca-Cola Trademark, Coca-Cola North America.

The launch of Full Throttle and Coca-Cola with Lime takes off a year of innovation for the Coca-Cola Company, which will include a range of offerings across all beverage categories.

The success of a sustainable solution is a key to providing information to a targeted audience. Sustainability can be a great way to market your product or service, and also create credibility and build your reputation in a timely manner.

First, determine the audience of the campaign. This could be anyone who might benefit from the information, or better, for

might consider purchasing a mailing list from a company.

If you explore the Publisher's listing, you will find many publications that match the size of your message.

Next, establish how much time and money you can spend on your campaign. These factors will help determine how frequently you publish the newsletter and its length. It's recommended that you establish your newsletter on a regular basis.

Doing Our Part to Address the Health & Wellness Trend

- 1 Introducing Full Throttle Energy Drink and Coca-Cola with Lime
- 2 St. Louis Cold Drink Team Wins Big with Subway
- 3 North America Group Appoints New President
- 4 18 Years of Business through Politics
- 5 Navigate the Corporate Ladder

Doing Our Part...

As an industry leader and the most recognized beverage brand in the world, Coca-Cola takes corporate responsibility and sustainability seriously, and we are ambitious to continue to lead in these areas. Our commitment to our consumers, customers, employees, communities, and environment.

Consumers have always been established health and wellness as a top priority in our product and marketing strategies. Innovation, and our vision of a diverse beverage portfolio that includes regular and diet sodas, energy drinks, bottled waters, sports drinks, teas, and bottled juices.

"This idea that obesity is caused by diet alone is wrong. In fact, we need to be part of the solution in this debate," said John Alts, President and Chief Executive Officer. "We are going to respond quickly to those who want to partner in an ongoing effort that we see as a great corporate citizen, a supporter of local schools and communities, and a company that delivers a variety of products."

Our system's commitment to "the right thing" has established health and wellness initiatives including the Power to Choose, Fitness Health Fair and others with organizations such as the Jewish Diabetes

Research Foundation (JDRF), Education, government officials, and members of the health community recognize our efforts as a responsible corporate partner.

"I have been emotionally touched at the sincere effort for Coca-Cola to make this much to local communities and our entire nation to achieve progress on the important role of physical activity," said Dr. Joseph A. Sparano, President and Professor of University of California, Davis.

In 2006, we will continue our current initiatives as well as develop new methods to support and encourage healthy living. Much of our focus this year is to provide consumers with facts on how beverages play a role in a balanced diet and nutritional information to help them make informed choices.

But our vision extends beyond the health community. Linking this information to customers and consumers will begin by educating our employees.

"I have been emotionally touched at the sincere effort the Coca-Cola system has made... to educate people on the important role of physical activity."

Terrance M. Marks Appointed President of the Coca-Cola Enterprises North America Group

We were here 18 years ago in 1988. Over the years, we have grown through key positions of increasing responsibility in the Coca-Cola system in Southern California to its appointment as the President and General Manager of both the New England Division and East Coast Region.

As the new president of the North America Group, I have been honored to be named as the President and General Manager of the Coca-Cola Enterprises North America Group in 2006. I was also named as the President and General Manager of the Coca-Cola Enterprises North America Group in 2006.

My leadership has been critical in establishing a strong foundation, which is one of our primary strategic objectives.

DOING OUR PART

BY ROBERT EVERYBODY, JR.

AN INHERENT LEADER AND THE most recognized beverage brand in the world, Coca-Cola takes corporate responsibility and sustainability seriously, and we are ambitious to continue to lead in these areas. Our commitment to our consumers, customers, employees, communities, and environment.

Consumers have always been established health and wellness as a top priority in our product and marketing strategies. Innovation, and our vision of a diverse beverage portfolio that includes regular and diet sodas, energy drinks, bottled waters, sports drinks, teas, and bottled juices.

"This idea that obesity is caused by diet alone is wrong. In fact, we need to be part of the solution in this debate," said John Alts, President and Chief Executive Officer. "We are going to respond quickly to those who want to partner in an ongoing effort that we see as a great corporate citizen, a supporter of local schools and communities, and a company that delivers a variety of products."

Our system's commitment to "the right thing" has established health and wellness initiatives including the Power to Choose, Fitness Health Fair and others with organizations such as the Jewish Diabetes Research Foundation (JDRF), Education, government officials, and members of the health community recognize our efforts as a responsible corporate partner.

"I have been emotionally

OPERATION EDUCATION

"Employees are passionate about CCE, because of this they are our greatest advocates. Achieving health and wellness issues is the toughest communication challenge we have ever faced, and it's imperative that every employee is informed of the facts and is able to engage in the public debate at the local level," said John Alts, President and Chief Executive Officer. "We are launching a series of assembly communications to educate employees on specific health and wellness topics."

Through the power of knowledge and education, we have what it takes to continue leading the industry and accomplishing our mission of bringing the refreshment and enjoyment of Coca-Cola and all of our brands to our consumers, customers, and our communities every day.

NEW ENERGY AND DIET DRINK

Introducing Full Throttle and Coca-Cola with Lime

The addition of Full Throttle to our new increasing beverage portfolio increases Coca-Cola as a viable contender in the new age, competitive world of energy drinks.

The U.S. energy drink category is expected to be two-thirds the size of the sports drink category by 2008. Energy drink sales were estimated to hit \$1.5 billion in the United States in 2006, according to Beverage Report.

With a list of active ingredients including guarana and natural extracts, vitamins B6 and B12, taurine, and caffeine, this beverage has just the right amount of punch to add to the energy drink lineup.

There are also concerns to release a sugar-free version for consumers who want to enjoy the same great taste and energizing benefits, but with fewer calories.

Coca-Cola with Lime follows the successful cold and new year age of Diet Coke with Lime, which has become the #1 flavored diet soda in America.

"Many people already enjoy a little of the new with their Coca-Cola. It's served only today to include a splash of the new in the 'Happy Hour' and 'Ready, Runners, Run!' event program, Coca-Cola Trademark, Coca-Cola North America.

The launch of Full Throttle and Coca-Cola with Lime takes off a year of innovation for the Coca-Cola Company, which will include a range of offerings across all beverage categories.
